

## THE CLEAR CHOICE

There are many variants of windshields in the marketplace, but the benefits of installing a Volvo Genuine Windshield are clear.

If you want to preserve the quality and safety of your vehicle, always insist on Volvo Genuine Windshields – identifiable by the Volvo markings on the windshield.

# VOLVO GENUINE WINDSHIELDS

MORE THAN JUST GLASS

### VOLVO GENUINE WINDSHIELDS

Retains the safety integrity of your Volvo

100% defect and distortion free for unobstructed visibility

Shaped to the precise curvature for a perfect fit

Thick laminated design provides resistance to breakage and protection against shattering during an accident

Exclusive bonding systems ensure Volvo windshields preserve the effectiveness of key Volvo safety systems

Recalibration only available from a Volvo dealer

*Every part in a Volvo interacts and works together to form a complete automotive system focused on safety. The windshield is one of the car's most important safety components.*

## **VOLVO SAFETY**

When your windshield needs replacement, ask for a Volvo Genuine Windshield. Why? Installing one guarantees the structural integrity of the vehicle and ensures safety systems relying on the windshield will not be compromised.

## **THROUGH THICK AND THIN**

Volvo Genuine Windshields are stronger and thicker than most aftermarket windshields. They are made to specific Volvo standards and are built with layers of high-strength glass bonded with an invisible reinforced plastic laminate. This makes them more resistant to chipping and shattering and minimizes the risk of splintering glass in the passenger compartment in the event of a collision. Volvo Genuine Windshields are manufactured to the same specifications as the windshield originally installed in the vehicle at time of assembly. They fit perfectly and work in harmony with all Volvo safety systems. Aftermarket alternatives may not meet

Volvo specifications and can affect the car's safety functions as well as the overall rigidity of the vehicle body.

## **CALIBRATION**

In today's Volvos, the camera and radar unit, located inside the upper edge of the windshield, enable about 20 different safety systems such as City Safety, Adaptive Cruise Control, Lane Keeping Aid, and Active High Beam Control.

Did you know that after a windshield replacement, recalibration of the camera and radar unit is required to ensure the functionality of a number of safety functions. Many aftermarket glass installers cannot perform this important service.

The best way to preserve the safety, performance and integrity of a Volvo is to always ask for a Volvo Genuine Windshield. Combine that with Volvo knowledge, training and specialized equipment, and the choice is clear.
